

ATS ELECTRO-LUBE
INTERNATIONAL INCORPORATED

JACK LUBER

Automatic Lubricator with Replaceable Cartridge

The **JACK LUBER** is the most versatile product in the ATS product line. It's built on the proven **ULTIMATE LUBERT™** technology incorporating the JACKSCREW mechanism. Together, you know it's powerful! The **JACK LUBER** has a replaceable, one-time use cartridge that changes out in seconds! The drive unit for the **JACK LUBER** is pure **ULTIMATE** power and runs off the ATS battery pack or with a direct AC/DC adaptor (**optional**). Producing **over 200 psi**, the **JACK LUBER** is capable of heavy duty applications running long lines; even through a 2 port distribution block. The **JACK LUBER** is tough, reliable and easy to work with. The **JACK LUBER** saves time, money and gives you the performance you need and trust from ATS!
